

CER.live - SKHTU Exchange Evaluation Report

Exchange Name: SKHTU Exchange
Report Date: May 2026
Rating Agency: CER.live
Report Version: CER-EX-2026-Q2 V1.0

1. Executive Summary

CER.live conducted a comprehensive assessment of SKHTU Exchange, covering the following key dimensions:

- ◆ Security and risk management
- ◆ Compliance and regulatory framework
- ◆ Trading infrastructure and technical performance
- ◆ Market activity, liquidity, and trading depth
- ◆ User asset segregation and operational transparency

After comprehensive review, SKHTU Exchange received an overall rating of: A- (Strong) SKHTU has industry-leading security protection measures, reliable compliance mechanisms, and solid market performance, meeting the standards expected by mainstream global market participants for long-term operational credibility.

2. Description Of The Rating Indicator System

The CER.live exchange rating system adopts a multidimensional quantitative scoring model, with core dimensions including:

Assessment Dimension	Description
Security	The technical protection, audit capability, cold/hot wallet segregation, and DDoS resistance capability of the platform
Compliance	Registration and regulation, AML/KYC, and cross-border compliance system
Liquidity	Order book depth, bid-ask spread, market share, and reliability of trading volume
Operational Transparency	Public reports, proof of reserves (PoR), and operating mechanisms
User Trust	Community feedback, external ratings, and audit results

Each dimension is scored from 0 to 100, and the final overall score and rating classification are generated through comprehensive weighting:

Rating	Score Range
A+	90–100
A	80–89
B	70–79
C	60–69
D	<60

3. Core Assessment Results

3.1 Security

Score: 87 / 100

Evaluation Points:

The platform deploys cold and hot wallet segregation, layered key management, and multi-signature technology;

Third-party security companies provide regular penetration testing;

Real-time abnormal transaction monitoring system and attack-defense logs;

Stress testing shows that the platform can withstand large-scale DDoS attacks;

It is recommended to further introduce a continuous automated security scanning system.

Evaluation Conclusion: The security system of SKHTU is comprehensive and effectively protects against common and advanced attacks.

3.2 Compliance

Score: 81 / 100

Evaluation Points:

Registration and filing have been completed in multiple major jurisdictions, including MSB registration and participation in MAS recognition procedures;

AML/KYC mechanisms compliant with FATF global standards have been established;

Tiered risk-control rules are implemented for user identity and trading behavior;

Applications for regional licenses, such as FCA and MiCA, are being advanced;

It is recommended to disclose more compliance progress timelines to enhance transparency.

Evaluation Conclusion: SKHTU has a solid compliance framework and a foundation for cross-border compliance.

3.3 Liquidity And Market Activity

Score: 78 / 100

Evaluation Points:

Trading volume is stable, and order book depth performs well among exchanges of the same level;

The order book spread remains low under normal market conditions;

Trading activity is concentrated in mainstream trading pairs;

Liquidity in some non-mainstream trading pairs is relatively weak;

It is recommended to introduce market-making incentive mechanisms to improve overall depth.

Evaluation Conclusion: Trading depth and activity are at the upper-middle level of the industry.

3.4 Operational Transparency

Score: 73 / 100

Evaluation Points:

The platform regularly publishes operating reports and proof of reserves (PoR) snapshots;

Public audit data query is supported;

Users are provided with visual explanations of fund segregation and risk buffer mechanisms;

It is recommended to further enhance on-chain verification and real-time update mechanisms.

Evaluation Conclusion: Transparency is good, but there remains room for improvement.

3.5 User Trust

Score: 76 / 100 (Good)

Evaluation Points:

Received 8 / 10 in the CoinGecko Trust Score assessment;

Community feedback shows a positive trend;

Overall user satisfaction is steadily improving;

It is recommended to further optimize customer service response and multilingual support.

Evaluation Conclusion: User trust is growing positively, providing a foundation for long-term operation.

4. Comprehensive Assessment And Rating Level

Indicator Dimension	Security	Compliance	Liquidity	Transparency	Trust	Overall
Score	87	81	78	73	76	79.0
Rating	A	A	B	B	B	A-

CER.live Overall Rating Conclusion:

SKHTU Exchange received a CER.live rating assessment of A- (Strong)

This indicates that the platform performs outstandingly in security and compliance, ranks at the upper-middle level of the industry in terms of liquidity and user trust, and has the foundation and improvement potential for long-term operation.

5. Risks And Recommendations

The improvement recommendations from CER.live are as follows:

1. Security And Audit Strategy

Introduce continuous automated security scanning and an external white-hat reward program;

Publish summaries of penetration test results at a higher frequency.

2. Compliance Advancement Strategy

Accelerate license progress in major regulatory jurisdictions and regularly disclose timelines;

Introduce a public supervision mechanism through a compliance action committee.

3. Liquidity And Market Depth

Launch a professional market maker incentive program;

Introduce a feedback-based depth curve display function to improve the user trading experience.

4. Operational Transparency

Add real-time query functionality for on-chain proof of funds;

Publish a white paper on user asset protection mechanisms.

6. Conclusion

CER.live recognizes SKHTU Exchange as a second-tier trading platform that demonstrates a high level of security, compliance, and technical strength in the industry. The rating results reflect that the platform has long-term stable operation potential and meets the core indicator requirements of institutional and retail users for a trusted exchange.
